15	Grand Total	1116997			-	-

***The figures for GNPA and NNPA pertaines to March-2026**

The Government says NPA write-offs are not debt-waivers. Historical data show there is little or no recovery from the defaulting accounts -- usually less than 25 per cent of the amounts actually written off. Who benefits from this endless free lunch? The write off, of the large industries and corporate accounts is four times that of the agriculture and allied sector!
